There is triumph and opportunity to be won in ensuring business goals are met through strategic process, tooling and collaborative innovation. Effective resource management along with stakeholder, interdepartmental, partner and client relations during a project's lifecycle provides momentum for confidence and collective motivation. Assertive milestone and deadline goals founded on best practices, state assessment and risk management provide an engaging playing field which cultivates unique, desirable and evolving products and solutions. I bring 14 years of multi-disciplinary and cross-functional agile web and mobile development experience to inspire and be inspired by the business, partners and customers.

Bose Corporation

- Employment Duration: **October 2009 to the present**
- Current Title: **Software Engineer III**
